

“Adopt a grandparent” Application

HIV is causing a shift in household structure and responsibilities. At a time when African grandmothers expect to be supported by their adult children, many find themselves with the role of fulltime caretakers of orphans and vulnerable children. Grandmothers are the backbone of HIV/AIDS care in Africa, but their contribution is rarely recognized and they receive little or no formal support. ARK model to support grandmothers with \$25 a month is a lifeline to many.

We invite you to join our support to grandmothers who care for orphans and vulnerable children. 100% of the donated \$25 a month goes directly to support your grandmother.
